

Anthony Dsouza

dsouzaanthony781@gmail.com | +91 9325374664

SKILLS

Languages: C#

Game Engine: Unity(Expert), Unreal Engine (Beginner - Blueprints)

Core development: Gameplay programming, VR/AR Development

Multiplayer: Netcode, Photon, Nakama, Mirror

VR/AR: Meta Quest, OpenXR, AR Foundation

Graphics: Shader Graph, VFX Graph, Particle system

Tools: Blender, Maya, Git

Backend & Integration : Rest API, Firebase

EDUCATION

AJEENKYA DY PATIL UNIVERSITY

B.SC. IN GAME DEVELOPMENT

2021-2024

Pune, Maharashtra

Unity & C#, AR Development with Vuforia, 2D/3D Game Development

SUMMARY

Unity Developer specializing in gameplay programming, VR/AR and multiplayer development, with experience building defense training simulations, real-time multiplayer environments, and interactive 3D applications. Strong focus on performance optimization, networking, and immersive user experiences.

EXPERIENCE

MAHARSHI INDUSTRIES PVT LTD. | VR DEVELOPER

July 2025 – Present | Ahmedabad, Gujarat

- Developed VR training simulations for defense sectors including Armed Forces, Police, Railways, and Disaster Response teams.
- Built real-time multiplayer firefighting simulator using Nakama backend.
- Developed interactive simulations including Drone simulator, Gun assembly/disassembly and Tank demo.
- Designed optimized VR workflows ensuring smooth performance on Meta Quest devices.

MARWORX TECHNOLOGIES PVT. LTD. | UNITY 3D DEVELOPER

(formerly Knight Motion Media LLP)

June 2024 – May 2025 | Pune, Maharashtra

- Developed AR human-detection app using YOLOv5 ONNX with Unity Sentic.
- Implemented multiplayer using Netcode for GameObjects.
- Integrated REST APIs for real-time data-driven applications.
- Embedded Unity scenes into a Flutter application for Android integration.

KNIGHT MOTION MEDIA LLP | UNITY 3D DEVELOPER - INTERNSHIP

March 2024 – June 2024 | Pune, Maharashtra

- Built immersive industry training and real estate walkthrough applications.
- Developed machine-operation simulation for Thermax Ltd.
- Delivered VR applications for Meta Quest platforms.

WORK PROJECTS

DEFENSE DRONE SIMULATOR | MAHARSHI INDUSTRIES PVT. LTD.

PC, VR (Meta Quest)

- Developed multiple drone systems: grenade-dropping, swarm, kamikaze, and logistics drones.
- Implemented physics-based movement with wind simulation.
- Designed mission scenarios including coordinated swarm attacks and tactical strike operations.
- Deployed simulation systems in Udaipur (PC) and Kathua (VR).

THERMOVERSE | MARWORX TECHNOLOGIES PVT. LTD

PC - Internal Application

- Developed multiple 3D industrial simulation applications of Thermax products.
- I was responsible for programming features, UI navigation, and creating high quality visuals by setting up scene lighting.
- Made use of particle system, shader graph and Vfx graph to create an accurate representation of the process viewed in real life.

FREELANCE PROJECTS

FORT

VR (Meta Quest)

- Developed a heritage exploration experience with interactive narration and location based history hotspots.
- I was responsible for programming UI interaction and Lighting of the environment.

PERSONAL PROJECTS

BOSS RUSH | PC (ITCH.IO)

A first person game with Boss fights

- I contributed by Designing, Modeling and programming the Enemy attack system.

HIRO | ANDROID (ITCH.IO)

A 3D Action/Adventure game

- Solo developed an Action Adventure game from game designing to game programming.
- Created 3d Models for characters, Environment, Enemies, Animals and props.
- Programmed Enemy Attack sequences, Inventory system, Dialog system,
